React Router

React Router

- JavaScript library for React that enables navigation and routing between different views in a single-page application (SPA)
- Provides a seamless multi-page experience without reloading the page.

■ You need a navbar, right?

Get started

- `pnpm create vite@latest`
- ...
- `pnpm install react-router`

Navbar Examples

- `main.tsx`
- `Layout.tsx`
- `App.tsx`
- `About.tsx`
- `Dashboard.tsx`
- `DashboardSettings.tsx`
